

# Multi-fit Inlines

Product No: MO1738

## ADJUSTING THE SKATE SIZE

To adjust the multi fit feature of your skates turn the small knob at the back of the skate clockwise when viewed from the rear to make the skate smaller, and counter clockwise to enlarge the skate. Reference to the size you are setting your skates can be seen in the round hole at the base of the rear section on either side. This size reference should only be used as a guide and it is important to ensure the fit of the skates are comfortable. When the rear section reaches either end of its travel do not try to force the knob as this may result in damage to the thread.

**IMPORTANT** Please ensure that all screws are tight. Please note there are 3 screws on insole of boot.

## INLINE SKATING SAFETY CODE

INLINE SKATING IS FUN BUT CAN BE DANGEROUS

- 1 Choose to inline skate in places which improve your skills.
- 2 Always beware of pedestrians and avoid main roads.
- 3 Always look after young children. It is important that they are never left alone.
- 4 Inline skaters starting to learn need to try with a friend or parent.
- 5 Wear the correct inline skating gear, helmet, gloves, knee and elbow pads. Long sleeves and trousers will help prevent grazing in the event of a fall.
- 6 Avoid inline skating on wet or uneven surfaces.
- 7 Join a club in your area or visit a inline skating rink.
- 8 Prove you are a good inline skater and care about yourself and others.
- 9 Ensure you do not contravene the 'Road Traffic Act' when skating.
- 10 Always choose a suitable surfaces to skate on (flat, clean, dry and where possible away from other road users).

## WARNING:

**PROTECTIVE EQUIPMENT SHOULD BE WORN**

**NOT SUITABLE FOR CHILDREN UNDER 36 MONTHS DUE TO SMALL PARTS**

## MAINTENANCE INSTRUCTIONS

To achieve the best results from your inline skates it is important to follow a few simple guidelines for safer skating.

- 1 On the ratchets, ensure these snap into position and the plastic straps remain tight.
- 2 The bearings fitted to the wheels are of the sealed unit type which means they require little or no maintenance. Before skating spin each wheel to ensure they spin freely, if there is any friction or the wheel wobbles then you need to check out the problem and if necessary replace the bearing. Ensure the area around the wheels is kept clean and free from mud. If you have been riding in the wet then dry off the boot and base of the skates. Remove the liner and make sure it is not wet and leave it out the boot until dry before replacing.
- 3 If while skating you accidentally hit a hard object such as a kerb, stop skating and check the skates for sharp edges and cracks. If damage has been caused then ask a parent to check the skates over and if in doubt seek the advice of a specialist, before riding again.
- 4 Remember to follow these few simple rules to ensure you obtain the best results and enjoyment from your skating. If in any doubt then seek the advice of an adult and do not use your skates until they have been checked out. Keep them clean and carry out a safety check before riding each time.
- 5 We recommend the use of protective pads and a safety helmet when skating.
- 6 Class B, maximum weight limit: 60kg.
- 7 **IMPORTANT:** Do not modify the design of the boot or chassis as this may impair safety.
- 8 These inline skates are designed to be used on a smooth paved surface and to operate the rear brakes roll heel backwards. Do not use on soft surfaces such as grass, soil or sand.
- 9 The inline skates do not contain a starting device. There is a braking device at the rear part and it functions whilst it touches the ground.
- 10 The bearing model is 608Z. Please add oil for lubrication periodically and replace bearings when they are worn.
- 11 Check self-locking nuts and other self-locking fixings as they may lose their effectiveness.
12. Remove any sharp edges which may be caused during use.
